

USE OF HAZARDOUS CHEMICAL AGENTS IN ANIMAL STUDIES FORM

Approval must be obtained from the IACUC before this study is performed.

Before any study involving the administration of hazardous chemicals to animals, the Chemical Committee must review and approve the use. Therefore the IACUC will forward this form to the Chemical Committee representative.

1	Principal Investigator		e-mail			
2	Title of Project					
3	Strain	Hazardous Chemical Agent/compound	# of animals/study	# of animal experiments/study	Dose	Route
4	Project start date: mm/dd/yyyy					
5	Length of time over which experiments will be performed					
6	Location where administration will occur:	Room#		Building		
7	Location where chemical agent animals will be housed	Lab.:		Animal facility room		
8	Length of time before the animal is being sacrificed					
9	Are pathogenic/infectious agents to be also administered?			YES	NO	

REQUIREMENTS:

UNLESS AN EXEMPTION IS GRANTED BY THE CHEMICAL COMMITTEE, THE FOLLOWING REQUIREMENTS ARE MANDATORY:

1. In the Animal Resource Center, all cages with animals must be labeled with a "Caution Chemical Agent" label stating the chemical, the date of administration, and the authorized user name.
2. Animal cages must be surveyed appropriately for contamination before being returned to the Animal Resource Center washer.
Animal carcasses that are disposed of as chemical agents should be packaged separately in special containers. Do not include any other material such as pads, tubing, needles, instruments, etc., with the carcass.
